J.S. Patent and Tra PTO-326 (Rev		Action Summary	Part of Paper No. 12	

Serial No. 09/869,806

Art Unit 1711

Claims 2-6 have been cancelled in accordance with page 4 of applicants' amendment listing the word "cancelled" after the claim numbers.

Claim 7 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention.

The term "methylpolymethacrylate" as appears in claim 7 is not art recognized and is therefore unclear.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 7-10 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Okawa et al. (USP 6,255,440).

Okawa et al. disclose a composition containing a polyacetal copolymer containing applicants' three monomeric components.

Note the Abstract. Note the paragraph bridging pages 5 and 6 where it is disclosed that "lubricants" may be added.

Serial No. 09/869,806

Art Unit 1711

There are no specific examples of compositions containing applicants' lubricants, however since patentees specifically disclose that lubricants may be added, it would have been obvious to a practitioner having ordinary skill in the art at the time of the invention to add lubricants to patentees' polyacetal copolymers in the expectation of adequate results absent any showing of surprising or unexpected results.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a certified translation of said papers has not been made of record. See MPEP § 201.15.

It is noted that the above U.S. patent is prior art under 35 U.S.C. § 102(e) but also the cover of the patent provides hearsay evidence that the disclosure of the patent was publicly available on February 3, 2000 since this is the date indicated as the PCT application date. Therefore hearsay evidence is provided that the subject matter of the patent was publicly available on February 3, 2000.

With regard to newly cited prior art, applicants' specific combination of specific component A plus B or C is not disclosed or suggested.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Mullis whose telephone number is (703) 308-2820. The examiner can normally be reached on Monday-Friday from 9:30 to 6:30.

Serial No. 09/869,806

Art Unit 1711

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck, can be reached on (703) 308-2462. The fax phone number for this Group is before final (703) 872-9310 and after final (703) 8729311.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-2351.
